Forged in a Knife Fight: China's Brutal Domestic AI Competition

China's plan to become a world leader in AI by 2030 is a fixture of practically every Congressional briefing and expert commentary on Beijing's AI ambitions. The plan's logic — introduced in 2017 —...

Iran war: Even a peace deal won't fix energy crunch

The growing energy and supply chain crisis is unlikely to ease even if the US and Iran step back from the brink. Experts warn that reopening the Strait of Hormuz and repairing infrastructure could...

Chartbook 450: Modern growth surges. Or, why China's economic development is unique in human history.

To the naked eye it is obvious that China's spectacular growth surge from the late 1970s onward is the largest single transformation in world economic history.
