

Spec — Guild v0.9 (beta): GitHub Release

mini-moi · Guild Created: 2026-06-13 — Claude.ai For: Claude Code

What's changing

minimoi.ai's landing page now shows "Guild v0.9" alongside Curator v1.1 and Mein Deutsch v1.0 (see `spec_landing_copy_round2_2026-06-13.md`). This spec marks that milestone on GitHub — a release/tag with notes summarizing what v0.9 actually includes, for anyone (recruiters, collaborators, future-me) landing on the repo from the "View source on GitHub" link.

First, check existing conventions — does the repo already have a CHANGELOG.md, prior release tags (`git tag -l`), or a version marker somewhere (package.json, VERSION file, GUILD_BUILD_LOG.md)? Match whatever pattern already exists. If there's no existing pattern, a GitHub Release created from a new tag is the simplest path — use the content below as the release description, and skip any CHANGELOG.md creation.

Release title

| Guild v0.9 (beta)

Suggested tag

| `guild-v0.9`

(Adjust if an existing tagging convention says otherwise — e.g. if Curator v1.1 / Mein Deutsch v1.0 already have tags following a different pattern, match that instead.)

Release description / blurb

Guild v0.9 (beta)

Guild is where the agents and I work together on design, build, and operations — and where Curator and Mein Deutsch get pulled into view alongside my own goals.

v0.9 brings:

- **Daily Briefing** (`/guild`) — systems health, Career Focus countdown, Build status, and what's ahead, in one place
- **Build Discipline** — specs move spec → queue → done at `/guild/build`, with automatic classification and archiving (this release went through the same

pipeline)

- **Career Focus** — active opportunity pipeline with LinkedIn-based warm-lead scoring
- **Chief of Staff + Operations agents** — cross-domain coordination, system health monitoring, staleness detection
- **Four background intelligence loops** — career focus scout, German domain watch, Curator topic scout, novelty watch
- **Two-row navigation + typography hierarchy** across Curator, Mein Deutsch, and Guild

Why beta: the four loops are newly live (first-fire review this week), and Build Discipline — while self-validating — is still young. v0.9 reflects real daily use, not a finished system.

Commit (if a docs update accompanies the tag — optional)

If GUILD_BUILD_LOG.md or similar already tracks milestones, add a short entry there rather than (or in addition to) the release. Suggested commit message either way:

```
bash
```

```
git commit -m "docs: mark Guild v0.9 (beta) milestone"
```

```
Guild reaches v0.9 (beta) - Daily Briefing, Build Discipline (spec -> queue  
-> done), Career Focus pipeline, Chief of Staff + Operations agents, and  
four background intelligence loops, all in daily use. Matches the v0.9  
label now shown on minimoi.ai's landing page alongside Curator v1.1 and  
Mein Deutsch v1.0."
```

Definition of Done

- ☐ Checked for existing CHANGELOG/tag/version conventions in the repo
 - ☐ Tag created (`guild-v0.9` or matching existing convention)
 - ☐ GitHub Release created with the description above (or adapted to fit existing CHANGELOG format if one exists)
 - ☐ Optional docs update committed if GUILD_BUILD_LOG.md tracks milestones
 - ☐ Robert confirms on GitHub
-
